Answers to Questions (FAQ)

What is a fake identity? (Definition)

A fake identity is the set of elements of a profile characterizing a person but being totally false.

Example: Reyes Joshua; born 1986-02-21; lives in New Orleans (United States) as a Maintenance & Repair Worker.

A fake lastname, a fake surname, a false birth date, a false city, a false job, etc. Everything is credible for anyone who does not know the real identity of the character.

Part 2 — Social Media Intelligence (SOCMINT)

Goal: Use OSINT/SOCMINT tools to analyze social data, sentiment, and presence.

a) Sentiment Analysis

- Tool: **Tweet Visualization**

b) Twitter Analysis

- Tool: **SocialBearing**

UPDATE: Due to unaffordable Twitter API pricing since Elon took over, Socialbearing is not longer operational. View full statement on <https://x.com/socialbearing>

In 2015, I launched a new [Twitter Search & Analytics tool socialbearing.com](https://socialbearing.com). It hooks up to many of the feeds available through [Twitter's API](#) such as user and home timelines, public and people search and mentions, follower and friend streams.

SOCIALBEARING BETA							
Twitter search & analytics for 'fireworks'							
Showing all public tweets that match your query. Twitter API results limited to the past 7 days. Tweets returned may be limited

Proffy does not support temporary emails anymore and is a paid service, you cannot make a single query without adding credits.

h) DeHashed

DeHashed is an OSINT tool and breach data search engine.

I have known for some time that one of my emails has occurred in 3 data breaches. so i will search the following email as a query in DeHashed.
